DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371© of this title before the invention thereof by the applicant for patent.

2. Claims 1, 2, 7-12, 14-18, 20-27, 29-35, 42, 43, 45, 51, 53-56, 66-76, and 78 are rejected under 35 U.S.C. 102(e) as being anticipated by Shimizu (5,945,799).

Shimizu discloses a vehicle drive assist system comprising a camera for picking up an image of an area existing in an advancing direction of a vehicle, a display means for displaying the image picked up by the camera, a steering angle detecting means for detecting a steering angle for steering a vehicle, a traveling path predicting means for predicting a traveling path of the vehicle on the basis of the steering angle detected by the steering angle detecting means and a drive assist means for overlaying on the display means drive assist information containing the vehicle predictive traveling path predicted by the traveling path predicting means and guide lines prolonged from the lines defining the width of the vehicle body on the image of the area existing in the vehicle advancing direction (Column 3 lines 1-20 and Column 4 lines 6-22); wherein the drive assist means displays the guide lines of the vehicle at a position on the predictive traveling

path (Column 4 lines 6-22); a drive assist means for switching drive assist information for parking overlaid on the image displayed by the display means between the drive assist information of a normal parking mode and that of a series of parking mode (Column 3 lines 21-40).

Allowable Subject Matter

3. Claims 3-6, 13, 19, 28, 36-41, 44, 46-50, 52, and 77 objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

4. Claim 57-65 and 79-86 allowed. The prior art of record fails to show or teach a display means that displays an image of the forward area of the vehicle and in a backward running where the display means displays more brightly an image of the backward area than an image of the forward area and a timer for counting a predetermined time for detecting a target parking position on the basis of the image picked up by the camera and judging a timing to reversely turn a steering wheel by an amount of turn of the steering wheel necessary to move the vehicle to the target parking position.
